PROJECT ARCHITECT

Mammoth Sports Construction is looking for a versatile and driven Project Architect to join our team to guide projects through all phases of project design and delivery. We are searching for candidates who are well organized, creative, forward thinking, detail oriented and work effectively in a collaborative team environment while also working autonomously on given tasks. This role will involve project management and development within the firm and active design as a valuable support to the firm's Principal Architect.

ABOUT MAMMOTH SPORTS CONSTRUCTION

Mammoth Sports Construction is a full-service, turnkey sports company for schools and athletic complexes that can help design, budget, fundraise and build the projects of our partner's dreams. Mammoth offers complete design-build services and is respected nationally as an industry leader with projects completed at the highest levels of sports, including the NFL, Big 10 Conference, Northern Sun Conference, Big 12 Conference, MIAA Conference, Southeastern Conference, Heart of America Athletic Conference and many others nationwide. Mammoth is a family owned and operated company with the corporate headquarters located in Meriden, Kansas, and an additional office opening this summer in Sioux Falls, South Dakota.

JOB LOCATION: Meriden, KS

SALARY: TBD Based on Qualifications + Benefits

RESPONSIBILITIES:

- Lead and develop design work and establish efforts of multiple team members.
- Engage clients to determine goals and responsible for project delivery.
- Leadership and team management skills to meet project scope, budgets and schedule while serving in capacity as a Studio Leader to organize project and document production. This responsibility will be in coordination with Firm Project Manager and Marketing Manager of Architectural Work.
- Experience and understanding of engineering systems, equipment, technology requirements, detailing and how they relate to construction.
- Perform construction administration duties for conformance with design intent and construction documents.
- Experience with necessary codes and regulatory standards.
- Communicate effectively with project team and clients.

POSITION QUALIFICATIONS:

- Proven experience in project development. Experience in detail and design development, construction documents and construction administration a plus.
- Understanding of client communications, contract documentation, project scheduling, team leadership, building design, technical detailing, consultant coordination and construction administration.
- Strong writing and presentation ability.
